## **70W solar panel**

## Overview

---

What is the size of a 70kW solar power system?

A 70kW solar power system using 370W panels requires about 331.5 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 70kW solar power systems are mostly suitable for Larger businesses with high energy needs and are classed as 'Commercial/Industrial'.

What is a 60W solar panel?

Its highly sensitive light source can charge your mobile power supply even under natural light or cloudy conditions. Providing a more stable output of up to 18V, the 60W solar panel is perfect for a variety of devices and applications. The solar panel is perfect for travelling or going on trips in the wilderness where portable power is needed.

What makes a solar panel a good choice?

The use of tempered, high transmissivity, low-iron glass ensures superior low light performance and high resistance to impact. Each solar panel is equipped with an 800mm lead from the junction box, inclusive of MC4 connectors, for effortless installation.

What is a PERC solar panel?

The inclusion of Passivated Emitter and Rear Cells (PERC) technology enhances the overall performance of these panels. In contrast to standard monocrystalline silicone designs, PERC cells exhibit improved low light performance by effectively utilizing the light that would otherwise pass through the cell, converting it back into electricity.
