

**SolarMax Pro Energy Storage Systems**

## **Actual price of photovoltaic panels installed on roof**

## Overview

---

How much does it cost to install a solar panel?

Solar panel installation costs \$10,000 to \$30,000 on average before tax credits or incentives. Traditional solar panels cost less than solar shingles but are more efficient and produce more wattage. \*Including asphalt shingle roof replacement.

What is the cost per watt for solar panels?

The national average residential solar cost per watt installed is \$3.10 for a typical 5kW to 7kW PV solar panels system when installed by local installers, before the 26% solar investment tax credits from the federal government.

How much does it cost to install a new roof?

The national average cost to install a new roof (with standard materials, not solar shingles) is \$14,643, while the typical upfront cost to install a solar roof is \$49,700 and \$34,700 after the 30% federal tax credit. Many factors will affect the cost of installing a new roof on your house, such as:

Should you replace your roof before installing solar panels?

If you're replacing your roof before solar system installation, consider steel standing seam. It combines the lightweight strength to support solar panels and the longevity to outlast them. The ideal roof for solar is one facing south with enough slope to properly tilt the panels and enough room for them.

How much electricity does a solar roof generate?

A solar roof generates 4 kW to 23 kW or more of electricity, depending on the roof and system size, sun exposure, and weather. Each active solar shingle or tile has a maximum power output of 45 to 80 watts. Hire an experienced solar roof installer near you to ensure your system is eligible for tax credits and rebates.

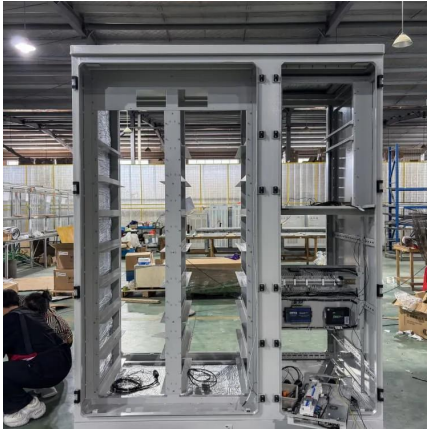

How long can solar panels last on an existing roof?

For existing roofs, consider solar panel installation on: Pro Tip: You can cheat 5-10 years on this if you're willing to replace your solar equipment sooner than 10-20 years.
