Should you use the Belgian electricity grid?

Making use of the Belgian electricity grid is often taken for granted. Nevertheless, there is a perfect alternative: provide your own energy and be independent of expensive public grid energy. Your very own, local energy-generating system supplies your electricity. It doesn't even matter how you generate that energy (solar panels, wind, etc.).

Should you go off the grid in Belgium?

Go off the grid. Making use of the Belgian electricity grid is often taken for granted. Nevertheless, there is a perfect alternative: provide your own energy and be independent of expensive public grid energy. Your very own, local energy-generating system supplies your electricity.

Who makes reliable solar inverters?

Solar-In is a trusted manufacturer of reliable solar inverters. Our team of experts designs and crafts high-quality inverters that ensure the efficient conversion of solar energy into electricity.

Does an off grid installation have an emergency generator?

The off grid installation can be equipped with an emergency generator running on natural gas. The solar panels remain the primary energy source. Surplus energy is stored in the batteries and released when required. The emergency generator helps in case of a shortage of energy during peak moments.

Are solar inverters reliable?

Trust Solar-In for reliable and high-quality solar inverters and batteries that will meet your energy needs with excellence. Solar-In inverters come in a range from 3 kW to 136 kW and offer an efficiency of over 97%.
