Central African Republic Customized Outdoor Power Supply

Overview

Did Central African Republic import electricity?

Central African Republic did not import electricity. Power generation, which includes electricity and heat, is one of the largest sources of CO2 emissions globally, primarily from the burning of fossil fuels like coal and natural gas in thermal power plants.

Why do we need electricity connections in Central Africa?

Such connections can help to balance out supply and demand across regions, which will be increasingly important as variable renewables like solar and wind make up a larger share of electricity generation. Central African Republic did not import electricity.

How many people have access to electricity in Central African Republic?

Less than 3% of the population has access to electricity in Central African Republic. Grid-based electricity supply is insufficient to meet electricity demand: it is unavailable 28% of the year on average, mainly due to generation outages.
