What is a litime solar inverter charger?

LiTime all-in-one solar inverter charger streamlines your system with fewer components and cables. It frees up wall space, simplifies installation, and

makes your power system cleaner, safer, and easier to manage. Stay informed at a glance with a built-in LCD screen that shows instant input/output, battery status, and load info.

How many Watts Does a solar inverter need?

Because the idle consumption is high on these all-in-ones, you will need at least 400 watts of solar panels attached to your system to offset the loss. If you do not plan to have your inverter on 24/7, this is not a problem. Some models have a lower solar panel array input voltage (usually 60-148VDC).
