for and locate a port.

What is a container freight station (CFS)?

A Container Freight Station (CFS) is located either within a port or at an inland location where goods are loaded into or unloaded from containers. It focuses on the consolidation and deconsolidation of cargo. Though both these facilities handle containers, there are key differences between them: [READ MORE:](#)  
What is LCL and FCL shipping?

.

What is a container freight station?

A container freight station (CFS) is a fundamental shipping industry facility that has transformed the manner of storing and shipping consignments to and from different countries. It has significantly enhanced the efficiency in carrying out a wide range of import-export business.

How a container is delivered to a destination port?

The container is delivered from the origin port CY to the destination port CY. Essentially, the shipper delivers the cargo to the CY for loading onto the ship, and the consignee collects it from the CY at the destination port. This method is straightforward and often preferred for its simplicity and efficiency.
