How much does a solar module cost in Europe?

Search4Solar, a European platform for buying and selling solar panels, inverters, and batteries, received a record-low PV module price this week at €0.055 (\$0.058) /W. “ This is the first time the €0.06/W threshold was surpassed,” Leen Van Bellen, business development manager Europe at Search4Solar told pv magazine.

What is Danish solar energy?

Danish solar energy releases the world's most efficient selection of colored solar modules. This ingenious technology is especially interesting for the building industry, where solar energy can be integrated 100% in the building so that roofs and facades in practice become energy producing.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of €0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of €0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

Are solar module prices at the lowest point in Europe?

Surpassing the €0.06/W threshold may indicate that solar module prices in the European market have hit their lowest point. “ This is the bottom in the EU,”

Van Bellen said. "The next step could be shipping back the products to China or selling them in Africa."

Are solar module prices a new low?

Solar module prices reached a new low this week, says Leen van Bellen, business development manager Europe for Search4Solar, a European purchasing and selling platform for solar products. He tells pv magazine that prices will remain low in the short term.
