Overview

Are military bases promoting 'standard-issue' clean tech solutions?

Experts told The Hill that Defense Department sponsorship of renewable energy pilot projects across the U.S. military base system was a major force pushing toward the evolution of “standard-issue” clean tech solutions — lowering costs and facilitating future adoption by cash-strapped municipalities.

What is a 6mw/6mwh battery energy storage system?

This event marks the culmination of efforts to enhance the base’s energy independence, sustainability, and potential for energy resiliency. The new activation is now live and features a 6 MW/6MWh battery energy storage system that integrates seamlessly with an existing 18.6 MW (DC) solar energy facility, which has been operational since 2016.

What is a LDEs-based power system?

The LDES-based system modeled in this report is a complex power system. The system includes Antora Energy’s BESS and a utility-scale solar PV. Antora Energy’s BESS has a thermal storage unit, TPV modules that generate DC power, a set of inverters to transform the DC power to AC, and a transformer.

Why is stationary energy storage important?

Stationary energy storage provides many value streams. It can be deployed in front of the meter in support of the grid or behind the meter to provide direct value for a customer. Both locations can contribute significantly to energy resiliency.

Are military bases a bulwark of the power system?

Military bases have played a similar role since the Obama era in helping to “de-risk” other frontier technologies that are now a growing bulwark of the power system — like the once-exotic pairing of solar and wind power with large-scale

batteries.

Can military use geothermal energy to power a military base?

Geothermal energy is a particularly promising solution for the military — virtually every base in the country is on top of subterranean resources they could use for heating and cooling, and many could use it for power. But it's only one of several types of clean energy the Defense Department is exploring or building out.
