## Overview

---

Do portable power stations make camping better?

A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Oupes. ↓ [Jump to the Rest of the Field](#) ↓ [What to Know Before Purchasing a Portable Power Station](#).

Why should you buy a portable power station?

The small premium for quality pays dividends through consistent performance and durability. With the right portable power station for your specific camping needs, you'll enjoy enhanced comfort, better device reliability, and the freedom to explore further without sacrificing modern conveniences. Happy camping!.

How much power does a portable power station need?

For portable power stations, capacity is measured in watt-hours (Wh), telling you how much energy the unit stores. Weekend adventures typically need 200-300Wh for smartphone charging and LED lighting. Glamping and campground camping with amenities require 500-700Wh units to power fans, portable coolers, and CPAP machines.

How much does a power station cost?

A cheap, super-portable power station. This one has everything you need and comes in at \$239. A cheap, portable power station offering a broad array of

ports and a decent power output for just \$239. A big power station available for a low price. If you want a lot of battery capacity, this is the one for you.

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.
