

SolarMax Pro Energy Storage Systems

German Valley Energy Storage Device Manufacturer

Overview

How much does Germany spend on EV and stationary battery research?

Public research and development incentives for EV and stationary battery research amount to between EUR 80 million and EUR 85 million every year. As the European lead market in the energy transition age, Germany provides the opportunity for companies to develop, test, define and market new energy storage solutions.

Is Germany a good place to invest in energy storage?

While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing industry. The country stands out as a unique market, development platform and export hub.

Why is Germany a good place to study energy storage?

Germany boasts a dense landscape of world-leading research institutes and universities active in the energy storage sector. They work closely together with industry to bring innovations to the market. The federal government supports research and development in the energy storage, hydrogen, fuel cell, and electric vehicle sectors.

Can German households buy or sell excess electricity?

German households can also buy or sell excess electricity on the company's new trading platform. Founded in Germany in 2009, SENECA develops and produces smart power storage systems and provides storage-based energy storage solutions to private households and small and medium-sized enterprises.

How does Germany support the energy transition?

The German population supports the goals of the energy transition. Improved energy self-sufficiency in private households and commercial operations

enjoys widespread acceptance. More than 1.7 million solar power plants, with a total capacity of more than 45 GWp, have been installed in Germany over the past 25 years.

How can private PV systems be used in a central energy storage system?

Innova-tive rental and leasing models, as well as district storage solutions which allow private PV systems owners to feed their surplus energy into a central energy storage device, are also being developed.
