

SolarMax Pro Energy Storage Systems

Greek energy storage system for sale

Overview

What is Greece's first battery energy storage auction?

Greece has released its first battery energy storage auction for 400 MW. This is the first competitive process for energy storage in Southeastern Europe. Two more rounds are expected in 2023. The Greek Regulatory Authority for Waste, Energy and Water (RAWEW) has published the country's first round of battery storage auctions.

Is Greece Slashing subsidies for battery energy storage projects?

The Greek government has decided to slash by 50% the available subsidies for the country's second tender for battery energy storage system (BESS) projects, Energypress reported on Friday. As much as EUR 100,000 (USD 105,417) per MW will be available for projects in the upcoming competition, against the EUR 200,000 per MW in the inaugural tender.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

What is the quota for battery energy storage in Greece?

The quota for the latter is 50 MW. The program is part of the just transition

efforts within Greece's coal phaseout, currently scheduled to be completed in 2026. Grants for the capital expenditure or capex for the battery energy storage systems (BESS) are set at EUR 200,000 per MW.

When will a battery storage project be up and running in Greece?

The awarded projects must be up and running by the end of April 2026, according to RAAEY. Greece awarded 400 MW and 300 MW of battery storage projects in earlier auction rounds held in 2023 and 2024. Marija has years of experience in a news agency environment and writing for print and online publications.
