Household 12v 250ah lithium battery with inverter

Overview

Where can the lithium battery powerbrick 12v-250ah be installed?

The PowerBrick lithium battery 12V-250Ah can be installed in any position, including vertically, lying on the side, or head down. Its electrical parameters are compatible with those of an AGM lead battery of 12V.

How safe is the lithium-ion power brick 12v-250ah battery?

The Lithium-Ion PowerBrick battery 12V-250Ah offers a high level of safety through the use of cylindrical cells in Lithium Ferro Phosphate technology (LiFePO₄ or LFP). This safety is further enhanced by the innovative Battery Management System (BMS) integrated into its casing.

How does powerbrick 12v-250ah battery management system work?

The PowerBrick 12V-250Ah integrates an innovative Battery Management System (BMS) in its casing to ensure a very high level of safety in use. The BMS constantly monitors and balances the battery cells to protect the battery and increase its life, and also protects it from misuse such as deep discharge or high charging voltage.

How many PowerBrick 12V batteries can be connected in series?

The PowerBrick Lithium battery 12V-250Ah can be easily assembled up to 4 PowerBrick 12V in series, or 2 PowerBrick 24V in series.

What is the nominal voltage of the PowerBrick Lithium battery?

The PowerBrick Lithium battery 12V-250Ah has a nominal voltage of 12.8V. Given PowerBrick can be 100% discharged, a lead acid or AGM battery can be replaced by a PowerBrick with half the capacity of lead acid battery (ie: PowerBrick 50Ah can replace a AGM 100Ah battery).

Can you use the same charging system for a PowerBrick lithium battery?

In the vast majority of cases, the charging system can be kept the same and no additional accessories are required to perform the replacement. The electrical parameters of the PowerBrick lithium battery 12V-250Ah are compatible in all respects with those of an AGM lead battery of 12V.
