

How many companies are there in Djibouti s electricity base station

Overview

How does electricity supply work in Djibouti?

Electricity supply services are provided through the vertically integrated utility Electricité de Djibouti (EDD). A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options.

Does Djibouti have a high electricity price?

Despite this reduction, Djibouti remains among one-third of African countries that have the highest electricity prices. Despite strong social pressure to further reduce the price of electricity, the country cannot afford to sustainably subsidize the electricity supply.

Does Djibouti have a power grid?

With regard to electricity, connection to the grid remains a critical problem for Djibouti's economy. As a result of the interconnection between Djibouti and Ethiopia, the output of the Djibouti Electric Power Utility (EDD) rose by 13.6% in 2013. However, the increase in electric power generation is only partly passed on to the population.

Does Djibouti need development partners?

While several partners are present in the energy sector, Djibouti's requirements in this sector remain so great that only a concerted effort and even greater need for investment by the development partners are required to improve the situation in this sector, which is of critical importance for the country's economy.

Can a country sustainably subsidize the electricity supply?

Despite strong social pressure to further reduce the price of electricity, the country cannot afford to sustainably subsidize the electricity supply. The government relies more on production and energy independence, and has set

a production goal of 100% of renewable energy by 2020.

What is Djibouti's Vision 2035?

A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options. Djibouti's Vision 2035 aims to achieve universal electricity access and power the nation with 100% renewable energy.
