# How much does a solar system cost in Syria

## Overview

---

How much does a solar system cost in Syria?

The cost of solar systems for most domestic uses, outside the framework of production projects, ranges between 4 million and 14 million Syrian pounds, according to what Enab Baladi monitored from the websites of companies that install power systems in regime-controlled areas.

Does Syria have solar energy?

Northeastern Syria, which is mostly under the control of the Autonomous Administration, is witnessing the spread of solar energy systems, like most Syrian regions, but they seem to be limited in the homes and facilities of families living in a good economic situation, according to what Enab Baladi monitored.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

How much does a solar system cost?

The mean values for present-day scenarios range from 326 € (kWh) –1 to 166 € (kWh) –1 for different efficiency-to-power ratios (E/P). In future/optimistic scenarios, average system costs are between 326 € (kWh) –1 and 112 € (kWh) –1.

Are solar panels allowed in Syria?

The Syrian Interim Government (SIG), which controls areas of rural Aleppo, issued a decision last May, excluding solar panels from customs duties at all crossings for a period of three months, until 31 July.

How much energy does a Syrian house need?

Nabil, 36, a resident of the countryside of Daraa governorate, told Enab Baladi that operating an entire house on solar energy needs at least 12 million Syrian pounds, a budget that is difficult for most families to secure in light of the deteriorating economic conditions.
