

**SolarMax Pro Energy Storage Systems**

## **How to choose an inverter to meet your home needs**

## Overview

---

How do I choose a good inverter?

Recommendation: For home use, especially if you want to power electronics, go with a pure sine wave inverter. 4. Select the Right Inverter Capacity (VA Rating) Inverter capacity is often measured in VA (Volt-Ampere), not just watts. Since inverters are not 100% efficient, consider their power factor (usually around 0.7-0.8 for home inverters).

How to choose the best inverter with a battery for home?

When looking for the best inverter with a battery for home, check that both the inverter and battery are compatible. Choosing the right battery type is equivalent to picking the best inverter for the home. Mainly, there are three types of batteries: Flat Plate Batteries: Good for areas where power cuts are rare and short.

How do I know if my inverter is good?

Inverter capacity is often measured in VA (Volt-Ampere), not just watts. Since inverters are not 100% efficient, consider their power factor (usually around 0.7-0.8 for home inverters). 5. Match with the Right Battery Size The inverter alone can't run without a battery.

How to find the right inverter power?

To find the right inverter power, calculate the total wattage of all the appliances you want to run during an outage. Tip: Always add 20-25% as a safety margin. So,  $595W \times 1.25 = \text{approx. } 750W$  inverter needed. 3. Choose the Inverter Type There are mainly two types of inverters:.

Which inverter is best for your home?

Using the above example: Inverter capacity =  $430 \div 0.7 = 614$  VA So, you must look for an inverter of around 650 VA or a little more. It is always better to keep some margin to avoid overload. If you are thinking which inverter is

best for your home when it comes to capacity, then remember to select based on your real usage instead of guessing.

Is it a good idea to use an inverter?

Ans: No, it's not a good idea. An inverter is made for running basic things like fans, lights, a TV, and a computer. Big devices like AC, water heater, or washing machine need a lot of power and may damage the inverter if used.

## How to choose an inverter to meet your home needs
