

Huawei grid-connected inverter outdoor installation

Overview

How to install Huawei inverter outdoors?

You are advised to install the inverter in a sheltered place or install an awning over it. The inverter will be corroded in salt areas. Before installing the inverter outdoors in salt areas, consult Huawei. A salt area refers to the region within 500 meters from the coast or prone to sea breeze.

Can a Huawei inverter be installed outside in Salt areas?

Before installing the inverter outdoors in salt areas, consult Huawei. A salt area refers to the region within 500 meters from the coast or prone to sea breeze. The regions prone to sea breeze vary with weather conditions (such as typhoons and monsoons) or terrains (such as dams and hills).

How to set a grid inverter based on a power grid?

Step 1 Choose Function Menu > Settings > Grid Parameters and set grid parameters. Set this parameter based on the grid code of the country or region where the inverter is used and the inverter application scenario. Set the working mode of the inverter based on the grounding status at DC side and the connection to the power grid.

Why is my Huawei solar inverter NOT working?

Turn off the AC output switch and then the DC input switch. Turn them on after 5 minutes and wait for the solar inverter to connect to the power grid. If the fault persists, contact your dealer or Huawei technical support. Cause ID = 1 The fuse is not in position or is blown. Cause ID = 2 The two relays on the breaking board are open-circuited.

How to wire a solar inverter?

Connect the AC output power cable according to the requirements specified by local power grid operators. Connect the power cable of the tracking system before the AC output power cable. Otherwise, reworking will be caused. Do not

connect loads between the solar inverter and the AC switch. If a copper cable is used, use copper wiring terminals.

What if my Huawei solar inverter alarm persists?

If the alarm persists, contact Huawei technical support. Cause ID = 1-20 This alarm is generated when the PV string status is abnormal due to the following conditions: a single PV string is lost; both 2-in-1 PV strings are lost; one of the 2-in-1 PV strings is lost. Check whether the solar inverter terminals are properly connected.
