Is it safe to bring an outdoor power bank to Australia

Overview

Why are there restrictions on power banks?

Power banks are considered dangerous goods under airline safety regulations because they contain lithium-ion batteries. For this reason, airlines have clear rules about how and where you can bring them on board.

Can you carry a power bank on a plane in Australia?

In Australia, the Civil Aviation Safety Authority (CASA) has rules for carrying anything with lithium-ion batteries. That includes your power bank. These batteries can sometimes overheat or cause issues, so there are limits in place to keep everyone safe. Here's what they say: You have to keep power banks in your carry-on bag.

Are portable power banks a must-have when travelling?

They have become a packing must-have when travelling. But changes are coming to the rules for portable power banks to charge your mobile on board planes. Most airlines have had a long-standing rule that you must pack them in your hand luggage, but now more regulations are being introduced for carry-on as well.

Are power banks safe?

Power banks are treated the same way by most airlines because the rules come from safety bodies like IATA (International Air Transport Association) and the FAA (Federal Aviation Administration). The good news is that the important points are pretty straightforward. You must keep power banks in your carry-on cabin bag.

What are Australia's power bank rules?

Australia's Airline Power Bank Rules 1. Capacity Limits $\leq 100\text{Wh}$ ($\approx 27,000\text{mAh}$): Allowed in carry-on luggage without approval. Example: A 20,000mAh power bank (typically 74Wh) is permitted. 100–160Wh: Requires

prior airline approval (rare for standard power banks). >160Wh: Banned on all passenger flights. 2.
