

**SolarMax Pro Energy Storage Systems**

# **Is there an energy storage power station in El Salvador**

## Overview

---

The 2007 National Energy Policy supports the diversification and increase of energy sources, mainly through renewable energy such as hydroelectricity, geothermal, solar, wind power and biofuels (as well as mineral coal and natural gas). Besides hydroelectricity and geothermal energy, the government foresees the addition of 50 MW of renewable generation in the next 10 years in the for.

Jinko ESS has achieved a significant milestone by deploying the first energy storage power plant in Central America. This 2.15 MWh system, integrated with a 3.6 MWp solar power plant in San Miguel, El Salvador, represents a major advancement in renewable energy for the region. How does electricity work in El Salvador?

From there, the gas powers 19 internal combustion engines and waste heat feeds one steam turbine. Two 230-kV electric transmission lines, one of which connects to the Central American Electrical Interconnection System, provides added grid reliability to the region and opens further opportunities for renewable energy in El Salvador.

Why is El Salvador a big importer of electricity?

El Salvador currently imports about one-quarter of the country's total electricity, making it the largest importer of electricity in Central America. Government officials have said the heavy reliance on imported power creates energy security risks, along with providing an economic challenge.

Why is the El Salvador power project important?

The power project, which began taking shape in 2013, is important for El Salvador because it offers cleaner energy production, replacing heavy fuel oil for power generation while offering flexibility the country needs to support the addition of more renewable energy resources to the national power grid.

What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for

hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisión Hidroeléctrica del Río Lempa), the rest of the generation capacity is in private hands.

Is there a solar map of El Salvador?

A solar map of the country is also under development. Currently, there are two geothermal facilities in operation in El Salvador, the 95 MW Ahuachapan, and the 66 MW Berlin plant. Majority state-owned power company LaGeo, formerly Gesal, operates the two plants.

How many geothermal plants are there in El Salvador?

Currently, there are two geothermal facilities in operation in El Salvador, the 95 MW Ahuachapan, and the 66 MW Berlin plant. Majority state-owned power company LaGeo, formerly Gesal, operates the two plants. LaGeo is currently expanding the two existing geothermal plants, as well as conducting a feasibility study for a third plant, Cuyanausul.

## Is there an energy storage power station in El Salvador

---

### San Salvador Energy Storage Power Generation

AES' Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to ...

### **OFF GRID ENERGY STORAGE EL SALVADOR**

Energy storage power station name This is a list of energy storage power plants worldwide, other than pumped hydro storage. Many individual energy storage plants augment electrical grids by ...

### **Energy storage leaders El Salvador**

AES'' Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to ...
