

**SolarMax Pro Energy Storage Systems**

## **Italian small energy storage cabinet system**

## Overview

---

What is energy storage?

ECONOMIC Behind a simple and elegant design the storage systems "all in one" Energy Storage hide a cutting-edge technology: they are able to accumulate energy instantly during the day and return it automatically with great efficiency by day, evening, night or when needed, thanks to lithium or accumulator batteries.

How does energy storage work?

The Energy Storage storage system is able to immediately record the energy demand and respond to the consumption in less than 1 or 2 seconds by drawing energy from the accumulator even if it is only charged at 30%. This system allows to optimize the consumption throughout the day and to take the minimum necessary from the power grid.

How long does energy storage last?

Energy Storage grants the best "unlimited" guarantees on the market: 10 years on the whole system "all in one" including lithium-iron-phosphate batteries or supercapacitor. Spare parts are delivered very quickly. Energy Storage comes with 24-hour free monitoring with prepaid SIM card from the manufacturer for all 10 years warranty.

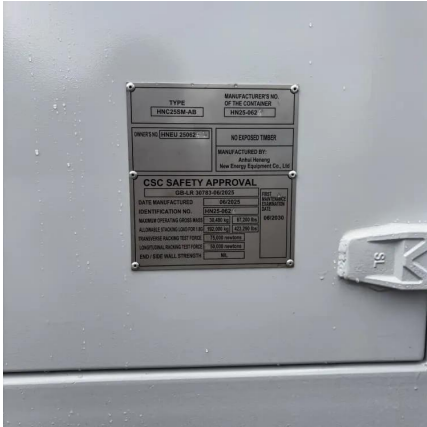

Are our storage systems compatible with all photovoltaic systems?

Our storage systems are compatible with all new or existing photovoltaic systems also in "Conto Energia". The cabinet manufactured by us for all types of system allows the increase of storage capacity over time by inserting 19" rack modules. Our storage systems are fully integrated and have reduced dimensions and weights.
