

SolarMax Pro Energy Storage Systems

Latvian Electric Energy Storage Project

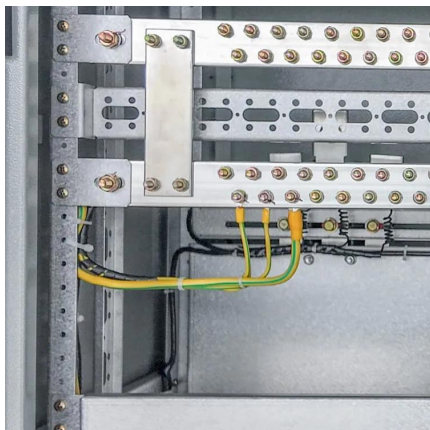

Overview

The Latvian transmission system operator Augstsprieguma tīkls (AST) signed a contract for the supply and installation of the battery energy storage system (BESS) in substations in Tume and Rēzekne with the German company Rolls-Royce Solutions, whose offer to implement the project for 77.07 million euros was the most economically advantageous in the competition of three suppliers.

Latvian Electric Energy Storage Project

SUNOTEC Acquires 400MWp Solar, 600MWh BESS Project Site in Latvia

European renewable energy provider SUNOTEC has finalized the acquisition of SIA DSE Lazas Solar's solar and energy storage project in Latvia from Danish Sun Energy. This ...

Latvenergo positive about Baltics' battery-powered future

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and ...

[Largest battery energy storage system \(BESS\) in ...](#)

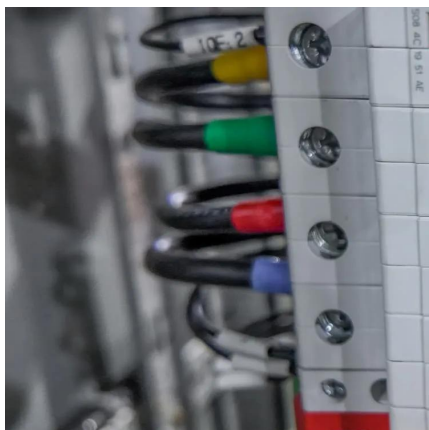

Renewable energy company Utilitas Wind has inaugurated the largest battery energy storage system (BESS) in Latvia to date, local media ...

[Latvia's largest battery energy storage system unveiled](#)

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-

scale battery energy storage battery system in Latvia with a total ...

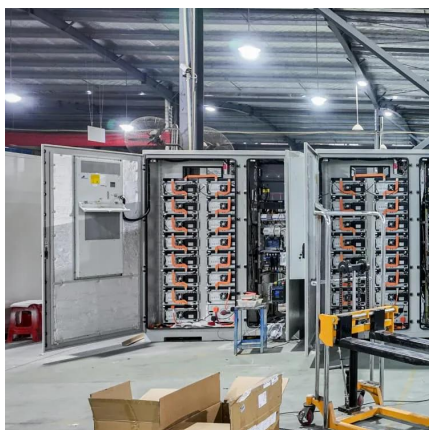

Latvia

Latvia's hydro-dominated electricity system provides a favourable starting point to use clean electricity to decarbonise other economic sectors. Moreover, given Latvia's historic ...

Europe's most powerful battery energy storage ...

Our battery solutions, being one of our strategic business areas, represent a sustainable and reliable contribution to energy security worldwide. The object ...

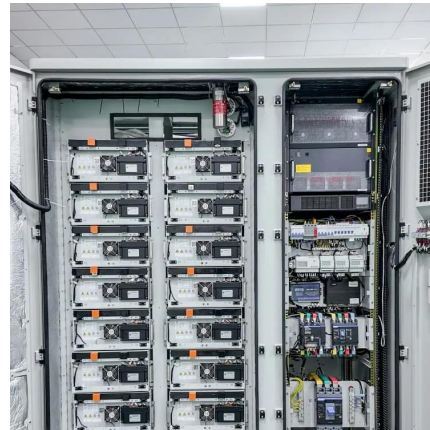

Meet Anna B?ta, last year's EUCYS participant from Latvia! Her project

Meet Anna B?ta, last year's EUCYS participant from Latvia! Her project "Application of renewable materials in the development of electrical energy storage devices" in the field of chemistry

Energy in Latvia

Latvia has laws that regulate the building of power plants and plans to sell electricity at higher prices. This is a stimulus for investment, especially taking into consideration the fact that ...

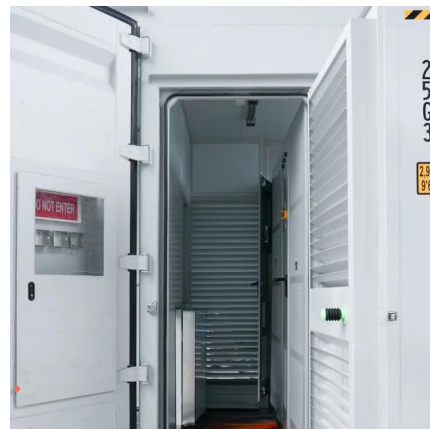

[Latvia's largest battery energy storage system unveiled](#)

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 ...

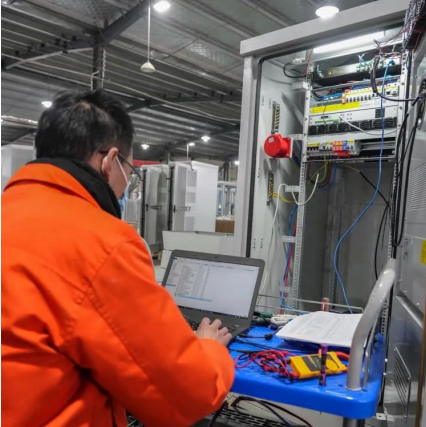

Europe's most powerful battery energy storage systems to be ...

Our battery solutions, being one of our strategic business areas, represent a sustainable and reliable contribution to energy security worldwide. The object planned in Latvia will be our ...

Latvian portable energy storage power supply procurement

The Latvian transmission system operator JSC "Augstsprieguma tīkls" (AST) signed a contract for the supply and installation of the battery energy storage system (BESS - Battery Energy ...

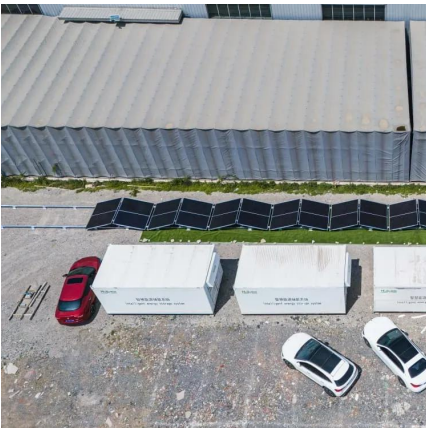

Latvia unveils first grid-scale battery as it prepares to ...

As the Baltic states of Latvia, Lithuania, and Estonia prepare to decouple their combined electricity grid from Russia, in favor of Europe, in ...

[Latvian pumped energy storage project bidder](#)

News from the Nordics and the Baltics, with BESS projects launched in Sweden, Denmark and Latvia by Centrica, Nordic Solar and Niam Infrastructure and Evecon. UK-headquartered utility ...

Utilitas Launches Latvia's First Utility-Scale Battery Energy Storage

Situated in the Ventspils region near the Targale wind park, the BESS project took approximately two years to complete and is set to connect to the Latvian electricity ...

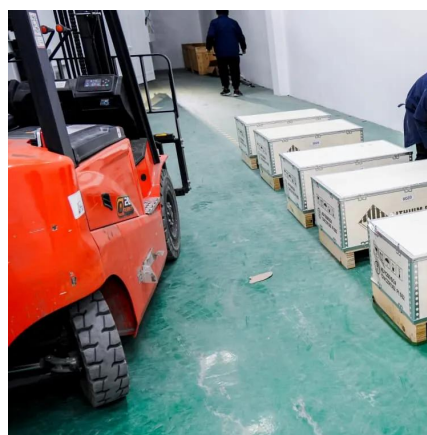

Latvenergo positive about Baltics' battery-powered future

BESS, or Battery Energy Storage System, is a technology that allows electricity to be stored with the objective of feeding it back into the grid at times of peak demand. The ...

Latvia unveils first grid-scale battery as it prepares to swap ...

As the Baltic states of Latvia, Lithuania, and Estonia prepare to decouple their combined electricity grid from Russia, in favor of Europe, in February 2025, Latvia has ...

Latvia's path to energy transition: Expanding renewable energy ...

Given Latvia's high share of renewable electricity, the need for electricity storage technologies will increase significantly. However, there are also challenges, such as the need ...

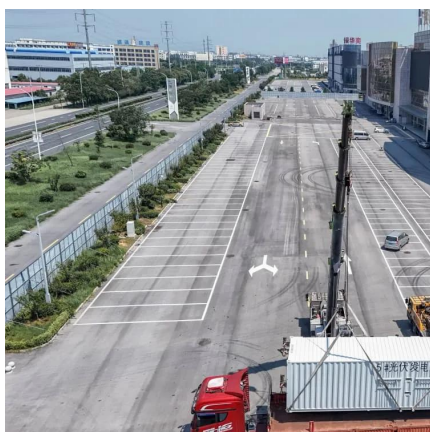

Utilitas Launches Latvia's First Utility-Scale Battery Energy ...

Situated in the Ventspils region near the Targale wind park, the BESS project took approximately two years to complete and is set to connect to the Latvian electricity ...

Latvian TSO signs contract for supply and installation of battery

The state-of-the-art battery system is expected to provide the high-speed and automatically-activated frequency regulation reserves needed for synchronisation mode, in ...

Latvia: first BESS opens ahead of Russia grid uncoupling

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last week (1 November) in Targale, a village in Latvia's ...

ENERGY-HUB

In news from Europe's Baltic Sea region, Latvia's first utility-scale battery storage project has been commissioned, while Fotowatio Renewable Ventures (FRV) has entered the Finland market.

Rolls-Royce supplies mtu large-scale battery storage to secure ...

In 2025, Latvia, together with the other Baltic states, will synchronize its energy supply system with the continental European power grid. Dr. Jörg Stratmann, CEO of Rolls ...

Latvia's recovery and resilience plan

In the area of climate and environmental policies, Latvia's challenges include the need to improve energy efficiency and accelerate the renovation of the ...

Utilitas inaugurates 10-MW battery in Latvia , Energy Storage ...

Located in the Ventspils region, right next to the Targale wind park, the BESS project took about two years to be realised and will be connected to the Latvian electricity ...
