

**SolarMax Pro Energy Storage Systems**

## **New energy battery cabinet original factory**

## Overview

---

Why should you choose energy storage cabinets?

This ensures that energy storage cabinets can provide a complete solution in emergency situations such as fires. To accommodate different climates, we provide professional recommendations based on customer usage scenarios and requirements.

Do energy storage cabinets need to be painted?

This ensures that energy storage cabinets maintain excellent appearance and performance, as well as resisting corrosion and UV radiation. We place particular emphasis on comprehensive pre-paint processes, including degreasing, cleaning and neutralisation, to ensure excellent paint adhesion and quality.

How many batteries will man produce in 2025?

From April 2025, the first phase of operations will see up to 50,000 batteries manufactured annually, with plans to increase capacity to 100,000 high-voltage. MAN is investing around €100 million in the new facility, covering costs for logistics, infrastructure, buildings, and production systems.

How many high-voltage batteries will be built in 2025?

From April 2025, up to 50,000 batteries per year will be built in an initial expansion phase. Depending on how the market develops, this capacity is to be expanded to up to 100,000 high-voltage batteries by 2030. At over 35 metres high, the new building is the tallest production building at the site.
