Perc type monocrystalline single-sided module

Overview

Mono-crystalline, as the name suggests, are PV panels with cells made up of a single (mono) crystal of Silicone. On the other hand, if we use multiple crystals in a single cell, then it is.

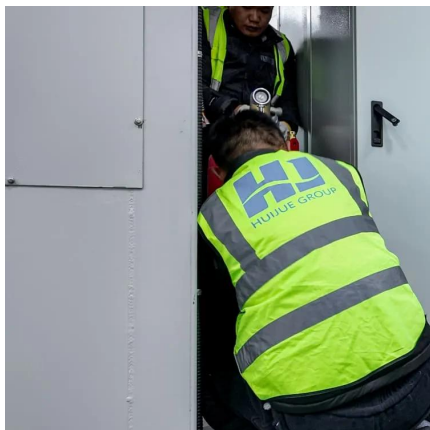

Till now, we have learned a lot about both mono & mono-perc panels. Let us now compare both of them based on factors like efficiency, cost.

I have compared mono vs mono-perc solar panels based on several factors like efficiency, cost, space requirement & temperature.

Mono-perc solar panels are slightly different from the standard monocrystalline panels. PERC stands for Passivated Emitter & Rear Cell is a modern technology used to.
