

SolarMax Pro Energy Storage Systems

Polish construction site container wholesale

Overview

MOBILBOX is a group of specialized companies and branches providing services in the following areas: container rental, container sales, container adaptation, container repair, container servicing, and modula.

Who are our containers built for?

Our containers are built for a specific purpose. We offer containers and we provide warranty and post-warranty service. We provide office, residential, storage, sanitary and social containers for companies from many industries. Our main recipients are construction companies that carry out investments in Poland and abroad.

What is a container manufacturer?

As a container manufacturer, we design container solutions adapted to the specifics of our Clients' businesses. We offer sales and rental of container modules, including: office containers, service containers, construction containers, shop containers, catering containers, changing room containers, sanitary containers.

How office container / modular building is designed?

The design of the office container or modular building is developed by experienced personnel in cooperation with the production plant, so that all necessary standards for its later use are maintained.

What services do you offer in a container installation?

Additionally, we offer warranty and post-warranty servicing, container buyback, and customization to individual needs. Our container installations include panoramic windows, air conditioning, electric heaters, security grills, external blinds, wooden cladding, entrance and serving window canopies, terraces, and balconie s.

How are container components created?

Most container components, excluding the equipment, is created in course of

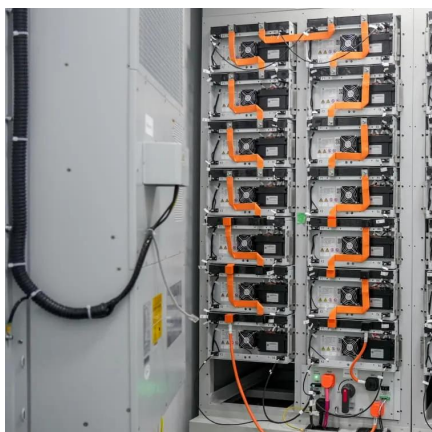

the manufacturing process at the production plant. It is our requirement that ethical and environmental standards are adhered to during production.

What is a container design?

The design of containers entails, among others, the selection of suppliers, components and technical capacities so that the design of the container or the container structure would correspond to the set goal and assumptions, and so that it would satisfy its users.
