

SolarMax Pro Energy Storage Systems

Portugal mobile energy storage vehicle price comparison

Overview

Is Portugal a leader in electric mobility in Europe?

Without a doubt, Portugal is establishing itself as one of the leading countries in the transition to electric mobility in Europe, surpassing its own records each year. Below, Mobility Portal España examines the keys to this success.

How many electric vehicles are there in Portugal?

In the case of the Portuguese market, the adoption of electric vehicles has increased strongly from year to year, making the EV share in Portugal at around 20 % of the total vehicle sales . In 2023, the total number of EVs in Portugal (battery electric vehicles and plug-in hybrid electric vehicles) is 228,140 units.

Does Portugal have a good EV infrastructure?

Portugal has achieved strong electric vehicle (EV) adoption—approximately 25–32% new-car EV penetration by 2023—but infrastructure growth must accelerate to keep pace. Its interoperable, nationally unified public network (MOBI.E) supports 7,000–8,000 public charge points today, including ~37% DC units.

When will electric vehicles be available in Portugal?

The locations are expected to be operational by the end of 2025. Apart from tenders, support from the Portuguese government is also an important driver in the transition towards electric mobility. For the purchase of electric vehicles, a full exemption from car tax is granted.

Is Portugal a leader in EV adoption?

Portugal has transformed into an advanced EV adoption leader within Europe—EV sales exceed 25% and charging network scaling continues. Yet infrastructure growth must accelerate to keep pace.

Is Portugal a good place to buy a car?

Despite being small, the PRIO representative says that the Portuguese market is also attractive for vehicle manufacturers. Without a doubt, Portugal is establishing itself as one of the leading countries in the transition to electric mobility in Europe, surpassing its own records each year.
