# **Price of electricity generated by mobile power station in Côte d Ivoire**

## Overview

---

How many MW does the Ivoirian power sector produce?

Electricity capacity stood at 2,548 Megawatts (MW) with 879 MW for hydroelectric plants and 1,669 MW for thermal power stations. The Ivoirian power sector recorded two new production units of 279 MW. The Ivoirian power sector relies on thermal power plants using natural gas as its main fuel source.

Does Cote d'Ivoire have electricity?

Most of Cote d'Ivoire's primary energy demand is covered by local oil refinery supplies and domestic gas production. Almost 60% of the population had access to electricity in the country in 2017, a 10-percentage point's increase from 2015.

Will Côte d'Ivoire have a coal-fired power plant?

These aspects are left for further research. This coal-fired power plant is expected to be the first ever built in Côte d'Ivoire. Note that the implicit price of carbon for the other scenarios is not worth studying because they show CO<sub>2</sub> emissions in 2050 below the Paris Agreement target.

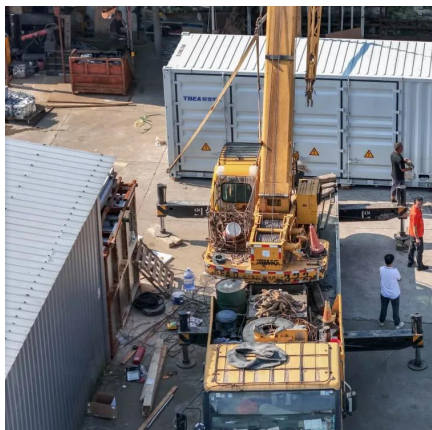

Who regulates electricity in Côte d'Ivoire?

The Côte d'Ivoire Electricity Sector Regulation National Authority (ANARE-CI): the National Regulatory Agency, which monitors compliance with regulations and conventions in force, settles disputes, protects consumer interests, and advises and assists the Ivoirian government.
