## **Price of photovoltaic panels with high current rating**

## Overview

---

Solar panel manufacturers are separated into different tiers. Tier 1 status is typically reserved for the largest manufacturers with automated production and some degree of vertical integration. Small- to medium-sized manufacturers are typically in Tier 2 or Tier 3.

Which solar panel has the best temperature coefficient?

At -0.24%, REC's Alpha Pure panel has the best temperature coefficient. It will lose less production at higher temperatures than other panels. Larger versions of specific solar panels are more efficient than smaller ones, and this is one of the largest panels on our list. It's guaranteed to produce at 92% of its original capacity after 25 years.

How efficient is a residential PV system in 2024?

The representative residential PV system (RPV) for 2024 has a rating of 8 kW dc (the sum of the system's module ratings). Each module has an area (with frame) of 1.9 m<sup>2</sup> and a rated power of 400 watts, corresponding to an efficiency of 21.1%.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.
