Could a battery storage system save Kosovo's Energy costs?

In fact, a 2018 study by the World Bank, which had for years supported the construction of Kosova e Re, found that if taking carbon and pollution costs into account, a combination of renewables and battery storage would be the most cost-effective solution for Kosovo's electricity sector.

How much money will Kott invest in a battery energy storage system?

The agreement involves an investment of approximately 236 million Dollars, with a major component being the installation of a Battery Energy Storage System (BESS) with a capacity of 340 MWh. As part of the BESS, KOSTT will own a portion of 90 MWh to provide its own ancillary services, specifically secondary reserves.

What are battery energy storage systems (Bess)?

As renewable energy sources become more prevalent in power generation, battery energy storage systems (BESS) are becoming an essential component of modern energy systems and an increasingly crucial component of the global energy transition towards a carbon-neutral economy.
