Purchase price of rooftop photovoltaic panels

Overview

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Are rooftop solar panels a good investment?

Another potential financial setback that comes with rooftop solar panels is that it can make it more difficult to sell your home. The average American moves at least 11 times during their lifetime. Investing in a \$30,000 rooftop solar panel system should theoretically increase the value of your home.

Are rooftop solar panels covered by homeowners insurance?

Furthermore, while most rooftop solar panel systems are eligible to be covered by a standard homeowner insurance policy, homeowners will most likely need to boost the amount of coverage they put on their homes due to the increased cost that comes with the solar panel system.

What type of roof is best for solar panels?

The ideal roof for solar is one facing south with enough slope and room for panels. A west-facing roof is the second-best option, followed by an east-facing roof. We recommend using Project SunRoof by Google to check if your home is suitable for solar.

Is installing solar panels on my roof a good idea?

For existing roofs, consider solar panel installation on: Pro Tip: You can “cheat” 5-10 years on this if you’re willing to replace your solar equipment sooner than 10-20 years.

How much does it cost to remove and reinstall roof panels?

It cost \$5,000 to remove and reinstall the panels after the roof was replaced. “If I had known the roof was in such bad shape, I would've replaced the roof before installing the panels,” Devin told us.
