

**SolarMax Pro Energy Storage Systems**

## **Russia invests in energy storage projects**

## Overview

---

There is currently no publicly available information documenting any direct investments by Gazprom in energy storage or battery technologies after January 1, 2025. This reaffirms its current position as a natural gas behemoth. Will Russian energy storage firm Renera invest in EV batteries?

June 23, 2023: Russian energy storage firm Renera says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

What is Russia's energy strategy?

The Energy Strategy outlines several key priorities: increased energy efficiency, reducing the impact on the environment, sustainable development, energy development and technological development, as well as improved effectiveness and competitiveness. Russia's greenhouse gas emissions are large because of its energy policy.

Why is the energy sector important to Russia?

The energy sector contributes to Russia's ability to expand its influence to its immediate neighbors. As the importance of the Russian Empire's energy sector grew, it became clear that Russia's internal stability greatly affected the sector. The Bolsheviks used the energy sector in their attempts to overthrow the monarchy in the early 1900s.

Should Russia create an infrastructure for EV charging stations?

Russia must also “create an infrastructure for charging stations” for EVs, he said. Rosatom announced on November 23 that it had established a new subsidiary — Renera — dedicated to the manufacture of energy storage systems.

Is Russia's energy sector under strain?

In its current configuration, Russia's energy sector is under strain. The consolidation of the sector mostly under two large state firms had many benefits for the Kremlin, but after a decade of consolidation the disadvantages are piling up.

Will Russia build a Gigafactory in 2023?

January 5, 2023: Russia's prime minister Mikhail Mishustin (pictured) says work has started on the first of a potential series of gigafactories as it scrambles to ramp up domestic battery manufacturing capacity for energy storage systems and EVs, after foreign investors and partners quit the country over the war with Ukraine.
