

Selling electricity and energy storage equipment

Overview

Can you sell energy back to the grid?

How does it work?

Who can participate?

Learn everything about selling energy, how much money you can earn, and more.

Can I sell energy back to the grid?

In summary, selling energy back to the grid can be complicated and expensive. However, there are other options available to commercial and residential consumers that are looking to reduce energy costs. Our team understands the electricity grids in the U.S. and can help you navigate selling energy back to the grid.

How do I Sell my Excess electricity back to the grid?

To start selling your excess electricity back to the grid and benefit from the Smart Export Guarantee, you'll need to ensure that your renewable energy system is set up correctly and registered with an SEG licensee. The basic equipment needed for SEG participation is relatively straightforward.

Can you sell electricity to a power company?

You draw down those credits when you come home and turn on the lights, but if over time you generate more credits than you use, you can sell the credits to the power company. The rules and rates for selling electricity to the grid vary from state to state, as well as by utility company.

Can I sell power to the grid without a generator?

As we stated previously, you cannot sell power to the grid without being a registered generator. You can, however, receive billing credits for excess power from a solar system or wind turbine. Read on to learn about the different ways to sell back power. This is the most common way consumers

believe they can sell electricity to the grid.

Why should you use a battery storage system?

Although solar panels play a key role in generating and exporting energy, battery storage systems can also be pivotal, allowing you to store excess energy and strategically export it to the grid when tariff rates are highest.

Can you sell electricity through net metering?

The rules and rates for selling electricity to the grid vary from state to state, as well as by utility company. Some make it easier than others, and there are caps on how much each household can sell via net metering, to prevent people from fleecing the utility companies.
