

Senegal Communications is now building 5G base stations

Overview

Will 5G be deployed in Senegal?

5G will soon be deployed in Senegal. Sonatel recently won the bid to commercialize the technology in the country. Senegal's telecom regulator, the ARTP, has provisionally awarded the 5G license to the Sonatel group through its commercial brand Orange.

Does Senegal have a 5G license?

Senegal's telecom regulator, the ARTP, has provisionally awarded the 5G license to the Sonatel group through its commercial brand Orange. Abdou Karim Sall, the director general of the watchdog, announced on July 17, 2023, during a press conference in Dakar. L'artp a attribué la 5G à la Sonatel.

Will Sonatel commercialize 5G in Senegal?

Sonatel recently won the bid to commercialize the technology in the country. Senegal's telecom regulator, the ARTP, has provisionally awarded the 5G license to the Sonatel group through its commercial brand Orange. Abdou Karim Sall, the director general of the watchdog, announced on July 17, 2023, during a press conference in Dakar.

Is free Senegal launching 5G in 2022?

Free Senegal also launched an experimental phase of 5G in June 2022. In July 2022, Sonatel, along with its parent company Orange, opened a 5G Lab in the capital, Dakar. In March 2023, ARTP instructed Sonatel and Free to halt their network trials and submit a progress report to the regulator.

Is 5G coming to Dakar?

The operator has invited prospective customers to see 5G in action at the Orange Digital Center (ODC) in Dakar. The launch of commercial 5G by Sonatel comes around seven months after the operator acquired the first 5G operating licence in Senegal from the Telecommunications and Postal

Regulatory Authority (ARTP) for \$57 million.

What are the prospects of the 5G base station market?

Because of the increased need for high-speed data with low latency, the 5G base station market is likely to develop significantly throughout the forecast period. Furthermore, the growth of the 5G IoT ecosystem and vital communication services is expected to provide lucrative prospects for the 5G base station market to expand.
