

SolarMax Pro Energy Storage Systems

Singapore outdoor energy storage power supplier

Overview

What is Singapore's solar energy system (ESS)?

Built across two sites on Jurong Island, our ESS enhances Singapore's grid resilience by mitigating the impact of solar intermittency as the republic progresses towards achieving its 2030 solar target of at least 2GWp and energy storage systems deployment of 200MWh beyond 2025.

What is an off-grid energy storage container?

OFF-GRID ENERGY STORAGE POWER An Off Grid Energy Storage powered container is suitable for facilities that requires a temporary and portability power supply solution, or locations with no access to grid power such as mobile site office, construction site, emergency command or medical centre, mobile cafe, charging station, events and others.

What are energy storage systems & how do they work?

Energy storage systems will restore the balance between supply and demand. The energy storage system is charged or discharged in response to an increase or decrease of grid frequency and keeps it within pre-set limits.
