

**SolarMax Pro Energy Storage Systems**

## **Swiss high-performance energy storage battery company**

## Overview

---

Offering 50% better environmental performance and extended durability, SCB supports renewable energy transitions with advanced energy storage solutions and one of Europe's first mass production facilities. What is Swiss battery technology?

The Swiss Battery Technology has the potential to mass produce rechargeable batteries using a renewable organic cathode and in the near future. The extensive adoption of Li-ion batteries employed in electric cars and consumer electronics will need order of magnitude more natural resources to a large extent for the automotive industry.

Who makes Swiss clean battery?

When building the factory and equipping it with the necessary production facilities, Swiss Clean Battery draws on established and renowned partners. Jonas & Redmann (Berlin), Munters (Hamburg), Dalex (Knowledge) and Metha Bau (Amriswil), for example, are on board.

Why are Swiss batteries made from low-temperature materials?

Swiss batteries material are manufactured using low-temperature processes, which saves most of the large amounts of energy used by conventional battery manufacturing. In this way, we are reducing large amounts of the CO2 emission during battery manufacturing.

How big is Swiss clean battery?

The production area will be expanded to about 100,000 sq m (119,599 sq yd) from 20,000 sq m in the initial phase. Swiss Clean Battery claims that the solid-state battery technology, licensed by Switzerland-based High Performance Battery AG, is a promising successor technology to lithium-ion batteries.

Where in Switzerland will Primeo energy install a battery storage system?

In Kappel, in the canton of Solothurn, we will install one of the largest battery

storage systems in Switzerland with a total capacity of 65 megawatt hours. Primeo Energie will use the stand-alone storage system to make energy more flexible and store electricity temporarily and withdraw it again when it is needed.

Does Switzerland's new large-scale battery support the Energy Strategy 2050?

The new large-scale battery for Switzerland in Kappel supports the Energy Strategy 2050 and supports renewable energies.
