

SolarMax Pro Energy Storage Systems

Vanuatu Energy Storage Power Station Investment Project

Overview

Supported by the U.S. Department of Energy's National Renewable Energy Laboratory (NREL) and the Australian Department of Foreign Affairs and Trade, this initiative has launched a transformative \$75 million solar generation and battery storage project in Vanuatu. Does Vanuatu have a low electricity access rate?

Vanuatu currently has one of the lowest electricity access rates in the world. Under the RESSET project, New Zealand will serve as the lead donor, providing the majority of funding for the installation of solar arrays and battery storage systems on Efate, near Port Vila, and the island of Tanna.

Will solar power boost Vanuatu's energy independence and climate resilience?

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience. New Zealand's Deputy Prime Minister and Minister for Foreign Affairs, Winston Peters, confirmed the country's commitment during a press conference held in Port Vila on Wednesday.

What is the energy access project in Vanuatu?

The project will assist Vanuatu install hydropower generation to replace diesel generation in Malekula and will extend the distribution grid in both Malekula and Espiritu Santo. Project preparatory technical assistance was used in project preparation. Energy Access Project: Audited Project Financial Statements (January-December 2021).

Does Vanuatu need electricity?

This initiative responds directly to Vanuatu's national climate goals and energy needs by improving access to clean and reliable electricity. Vanuatu currently has one of the lowest electricity access rates in the world.

How does reliance on fossil fuels affect Vanuatu's economy?

Over-reliance on imported fossil fuels (diesel) also has a negative macro-economic impact. In order to address these issues, the Government of Vanuatu has requested ADB to support development of least-cost renewable energy (hydropower) and grid extensions in targeted provincial centers.
