

**SolarMax Pro Energy Storage Systems**

## **What are the 2 2KWH base stations in Togo**

## Overview

---

How many power plants are there in Togo?

Currently, seven power plants are operated with fossil fuels in Togo with a cumulated capacity of ~260 MW. These so-called thermal power plants use thermal gas, thermal oil and thermal DDO to produce electrical energy. Most of the power plants of this type are managed by the grid operator and utility CEET.

Which power plant increases Togo's electricity production capacity?

This power plant increases Togo's electricity production capacity by 50%.  
Blitta Solar Plant The Sheikh Mohamed Bin Zayed solar power plant or Blitta's solar plant (located in the central region, 262 km from Lomé) was built by AMEA Togo Solar, a subsidiary of AMEA Power, and inaugurated in June 2021.

How much energy does Togo use?

In total, electricity supply of 1.162 GWh is thus achieved through distribution losses, resulting in a final electricity consumption of 876 GWh. Togo's total energy consumption is divided into three sectors. The largest share, 76%, is in the use of biomass, followed by petroleum products 20%. Only 4% of energy is used in the form of electricity.

What type of electricity does Togo use?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Togo: How much of the country's electricity comes from nuclear power?

.

Who manages the power plants in Togo?

Most of the power plants of this type are managed by the grid operator and utility CEET. The largest two run by CEET are located in the capital Lomé and have a capacity of 12MW each. The largest thermal power plant in Togo is operated by Contour Global, a private company and has a capacity of 100 MW.

Which hydropower plant is the largest in Togo?

The largest hydropower plant, the Nangbeto Hydropower Plant, has been in operation for several years and makes a major contribution to the electricity supply in Togo. Many smaller power plants are already planned. Direct use of Biomass: Vegetal biomass consists of forest resources and plants wastes.
