## **What is the voltage of the inverter in Albania**

## Overview

---

What is the voltage in Albania?

Just like the rest of Europe, the voltage in Albania is 230 volts and the frequency is 50 Hz. Albania has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

Which power plugs are compatible in Albania?

Select your country of residence, to check the compatibility of your power plugs in Albania. In Albania, power plugs and sockets (outlets) of type C and type F are used. The standard voltage is 230 V at a frequency of 50 Hz.

Do I need a power converter in Albania?

Devices with a type G plug, like those from the UK, Ireland, Cyprus, and Malta, need an adapter which is cheap to buy in Albania or in your home country (check Amazon.com for example). A power adapter is very easy to use, but make sure you buy the right one for your device and destination. Do I Need a Voltage Converter for Albania?

.

What type of power sockets are available in Albania?

The power sockets in Albania are of type C and F. The standard voltage is 230 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter in Albania.

How do I use electricity in Albania?

Plug your device into the power adapter or voltage converter, and plug the power adapter or voltage converter into the socket. Turn on the switch on the socket and wait for your device to charge. Here are some tips to help you use electricity in Albania safely and efficiently:.

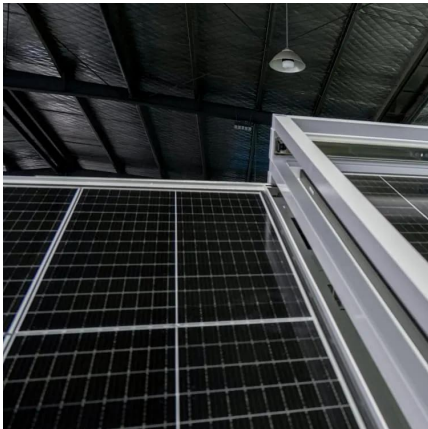

Do I need a travel adapter in Albania?

The electrical outlets and power plugs in Albania are of types C & F (see images). If your country uses the same electrical outlets and power plugs, you don't need a travel adapter. However, you may still need a voltage converter if the voltage is different.
