Which power storage vehicle is best in Papua New Guinea

Overview

Do electric cars need to be replaced in Papua New Guinea?

Electric cars do not have clutches, gearboxes and oil filters that constantly require replacement in the challenging PNG environment. Papua New Guinea's first plug-in electric vehicles (EVs) – two cargo vans and a passenger bus – have appeared on the streets of Port Moresby. Ruby Gamoga reports.

Are png companies ready to embrace the new technology?

There are many PNG companies ready to embrace the new technology, Shi says. The first Maxus eT60 utes were due to arrive in the country in October, and Shi says there is quite a demand for them with a number of corporate companies in PNG having already made inquiries to replace their fleets.

How many kilometres a day does a car drive in Port Moresby?

The reality is these cars have a range of 450 kilometres and the average driver in Port Moresby does 15 kilometres a day. Managing Director and majority owner, Leon Shi, says the company plans to help the PNG government towards its stated aim of converting 50 per cent of its fleet to EVs by 2030.

Is there a demand for Maxus et60 Utes in PNG?

The first Maxus eT60 utes were due to arrive in the country in October, and Shi says there is quite a demand for them with a number of corporate companies in PNG having already made inquiries to replace their fleets. “We are also getting the Maxus MIFA 9 people carrier and there is a lot of interest from the hotel chains for that [model].”
